**DETAILED ACTION**

***Response to Amendment***

1. Claims 1-4, 6-13, 15, 16 and 27 are pending.

Claim 1 has been amended.

Claims 1-4, 6-12, 15, 16 and 27 are examined on the merits.

***Specification***

2. The disclosure is objected to because of the following informality: the substitute specification contains lined through and underlined text. The clean version of the specification should not contain such markings. Applicants should review 37 CFR 1.125.

Correction is required.

***Withdrawn Rejections***

***Claim Rejections - 35 USC § 112***

- 3 The rejection of claims 1-4, 6-12, 15 and 16 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn in light of a claim amendment.

Art Unit: 1642

***Claim Rejections - 35 USC § 102***

4. The rejection of claims 1-4, 6, 8, 9 and 12 under 35 U.S.C. 102(b) as being anticipated Sim et al. (Cancer Research 57:1329-1334, April 1, 1997) is withdrawn in light of the amendment to claim 1.

***New Grounds of Rejection***

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-4, 6-12, 15 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants have broadly claimed a composition comprising a deglycosylated kringle 1-3 region fragment of a plasminogen protein and optionally a naturally glycosylated kringle 1-3 region fragment. Applicants' specification evidences possession of a deglycosylated kringle 1-3 region of human plasminogen protein, SEQ ID NO: 2, Figure 1; page 3, lines 21-28; page 12, lines 3-13. Applicants are not in possession of any other kringle 1-3 region proteins found within angiostatin from any and all species of animals.

Art Unit: 1642

*Vas-Cath Inc. V. Mahurkar*, 19 USPQ2d 1111, clearly states that “applicant must convey with reasonable clarity to those skilled in the art that, as of the filing date sought, he or she was in possession of *the invention*. The invention is, for purposes of the ‘written description’ inquiry, *whatever is now claimed*.” (See page 1117). The specification does not “clearly allow persons of ordinary skill in the art to recognize that [he or she] invented what is claimed.” (See *Vas-Cath* at page 1116). Applicant is reminded that *Vas-Cath* makes clear that the written description provision of 35 USC 112 is severable from its enablement provision (see page 115).

Applicants are not entitled, nor is the specification enabled for the use of any and all kringle 1-3 region fragments of plasminogen from any species encompassed by the claims and the specification, see page 10, lines 5-9 and 27-33; bridging sentence of page 11 and 12. Applicants are only in possession of one species identified as SEQ ID NO: 2. Applicants are not permitted to claim all kringle 1-3 fragment regions encompassed by the claims, hence not entitled to the wide breadth of the claims at issue.

This is insufficient to support the generic claims as provided by the Interim Written Description Guidelines published in the June 15, 1998 Federal Register at Volume 63, Number 114, pages 32639-32645.

***Allowable Subject Matter***

7. Claim 27 is allowed.
